---

[1] You must read the technical recommendations and restrictions provided by the editors to make sure that forward compatibility is supported.

Sage

Components	Compatible versions and Comments
Database Server Operating System	Refer to SQL Server documentation.
Internet Browser (HTML5)	Any x64 HTML5 web browser shall be compatible. Note R&D ensures testing with the following: - Google Chrome x64 - Firefox Quantum x64 - Microsoft Edge x64 We recommend to always use the most recent version of your browser, make sure it is regularly updated.
Web Server	Microsoft IIS 10 minimum, provided by Windows Server as a component.

Sizing

Applicable to **all 2024 versions until further notice**.

We highly recommend you contact your Sage representative as sizing depends on various criteria including volume, number of end users, processes, views that you will define.

| Hardware	Recommendations
Work-station	All OS. Workstation must provide an x64 HTML5 Web Browser with a minimum of 8GB RAM available. Please note that R&D is ensuring tests on Windows client workstations.
Application Server	Windows Server 2019 or 2022 with IIS deployed. X4 Core 32GB RAM minimum
Database Server	Respect Microsoft SQL Server recommendations according to your needs.

Bandwidth

Bandwidth between 50 and 100 Mbps

Data rates: 50 Mbps

- Ideal speed for large businesses that rely heavily on internet applications, file sharing, etc.
- Supports HD video surveillance, streaming and video conferencing

Data rates: 110 Mbps

- Ultra-fast speed and seamless connection
- Best option for businesses with many users working on the cloud or remotely
- The speed of your connection allows for real-time data collection, storage, HD video conferencing, etc.
