- ✘ Fix add table in process when logged in Spanish
- ✘ Allow DB2 table with \$ character in name
- ✘ Fix dashboard distribution scaling
- ✘ Fix saving with filter of a worksheet with pivot

New prerequisites of 7.2.0 (See Architecture and Documentation for full information)

- Microsoft SQL Server 2005 is not compatible since the OLAP Manager Scheduler uses datetimeoffset data type.
- Sage Enterprise Intelligence requires svcpr100.dll and msxcr100.dll, which are Microsoft Visual C++ 2010 Redistributable Packages.
